

FOAMLIFE®

SPRING/SUMMER 26

LIVE LESS ORDINARY

Industry Testimonials

FoamLife® was created by a collective of like-minded athletes and creatives who have grown up living and breathing a beach lifestyle.

We met the FoamLife crew early in their journey and it has been great to watch their growth and range evolution. When the opportunity came to bring them into the Australian and New Zealand markets it felt like quite an organic step for Stokehouse Australia. We have the Vissla Brand as our anchor brand and it feels that FoamLife, with its style meets sustainability focus, complements it perfectly. We have done some market testing here and it has been pleasing to see just how well the brand has been received. It sets FoamLife up nicely for its first full season in Australia in the summer of 2024.”

John Mossop (Head of Vissla/Stokehouse Australia)

“It’s rare to see a best-seller before it’s even launched. FoamLife is that product. Brought to life by a dream-team of the best in brand, design and sports. This is the right product with the right brand at the right time”.

Simon Hill-Norton – Chair & Co-Founder | Sweaty Betty

“A great product combined with a great team. I believe FoamLife has the commitment, passion and vision to become a leading brand. Globally.”

Harry Hodge – Founder | Quiksilver Europe & Senior Partner | Hodge Consulting Group

“Sometimes there’s a gap in the market, other times you might squeeze your way in and make a gap and sometimes you see a market that has become lazy, dull and complacent and needs a bloody good shake up from some guys who know what they’re doing.”

Dylan Wyn Pugh – Head of Commercial | Red Bull

Our Mission

FoamLife® creates simple, stylish and supremely comfortable footwear that treads lightly on the planet!

The FoamLife® mantra is to 'Live Less Ordinary', less about the daily grind and more about discovering your own path.

Our Vision

FoamLife® aspires to be a global leader in sustainably focused footwear, inspiring a movement towards mindful living with stylish and comfortable designs that respect our planet.

We view the journey to becoming a more sustainable brand a journey that has no final destination, where innovation of Eco-conscious products and packaging is the new normal.

New Product

We are expanding beyond flip-flops into closed-toe footwear.

Release for Autumn / Winter 2025, is a Men's & Women's closed-toe style in 6 colourway options.

Product

We are conscious our planet and oceans are not only our playground but also our future.

We therefore have a long term focus on sustainability.

All of our packaging is plastic free from the factory to the end consumer. We use biodegradable bags made from cornstarch, recycled card for hangers and swing tags which are attached with recycled paper string.

Our entire range uses a 'soft to step' foam. We use a variety of Eco-friendly foams such as recycled EVA, a sugarcane EVA and a Bloom Algae-blended EVA foam.

We use other recycled and sustainable materials such as natural rubber, hemp canvas, plant-based bio leathers and various RPET fabrics that are made from post-consumer recycled plastic bottles.

The entire collection is vegan friendly and PVC free.

**KARL
READ**

This image was originally painted in 2018 at Upfest (Europe's largest urban paint festival) in Bristol, UK and later released as a Limited Edition signed & numbered screenprint. (Sold Out on release)

The inspiration behind this piece came from when President Trump decided to legalise the importation of ivory in to the U.S

Titled "Hidden Treasure" it shows an African tribesman trying to camoflaughe the elephant to protect it from poachers. Each camo shape is the map/silohette of Africa.
