75 Years of Innovation. Here at O'Neill Wetsuits, we constantly push the boundaries of technical limitations. As a testament to the spirit of innovation our Founder, Jack O'Neill, pioneered back in 1952, this year we are releasing new technical materials, special edition colors, and new designs with a focus on high-performance, lightweight coverage.

The Area 52 team combines the most experienced designers, engineers, pattern makers, and the world's best athletes as test pilots. Multiple hand built and refined prototypes allow us to create the best fitting most technically advanced wetsuits in the industry.

MEN'S COLLECTION

SEAM CONSTRUCTION

STITCHLESS

All seams are fully sealed, blocking out water on both sides using internal TBX tape and our external 8mm silicone-based urethane Fluid Seam Weld. This is the most durable, comfortable, flexible, and longest-lasting watertight seam seal in surf wetsuits.

FLUID SEAM WELD

8mm silicone-based urethane sealed exterior with a triple-glued and blind stitched interior. Watertight, durable, and ultra-flexible seam.

TB3X TAPED SEAMS

The lightest, most stretchy neoprene seam tape ever. 0.5mm split-neoprene applied to triple-glued seams with water-based glue to keep you dry and loose.

GBS SEAMS

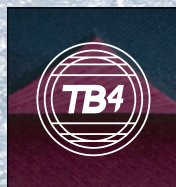

Blind stitched and triple-glued to create a watertight seam, for increased durability while allowing the maximum stretch possible in a sealed stitched seam.

FLATLOCK

Overlapped bevel cut material panels sewn together. This is a strong and comfortable stitch that lies flat. Creates a breathable seam for warm and tropical to cool conditions.

MATERIALS

TECHNOBUTTER 4

TB4 features a form-fitting, durable outer grid jersey combined with our comfortable, soft, and stretchy inner jersey, providing increased wear resistance and warmth thanks to durable graphene-infused fibers.

TECHNOBUTTER 3

O'Neill's exclusive 3rd Generation TechnoButter neoprene defies convention as a durable, hydrophobic, and stretchy material that conforms to the body.

FLUIDFLEX FIREWALL

Windproof, water-shedding smoothskin with thermal insulating and water-wicking internal liner. Fast dry times and

TECHNOBUTTER 4X

TechnoButter 4X goes beyond the soft gooe stretch and feel of TB3X. Graphene-infused fibers line the jersey, allowing for incredible stretch with added strength and warmth retention, all with a new look.

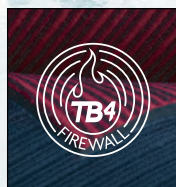

TECHNOBUTTER 3X

TB3X neoprene pushes the limit of flexibility to the next level. We've taken the inside of TB3 and added it to the outside, creating a near-endless amount of stretch. The buttery soft feel and super stretch make TB3X a true game-changer.

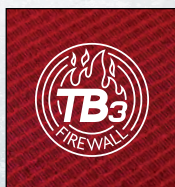

NYTROLITE FOAM

3X lighter than regular PVC foam with closed cell foam structure that absorbs 15-20% less water. Approximately 10% more buoyant than PVC foam.

TB4 FIREWALL

TechnoButter 4 Firewall dries fast and utilizes high loft graphene-infused fibers to create a fire hot feedback loop. As the body heat warms the graphene fibers, they conduct the heat back into the body.

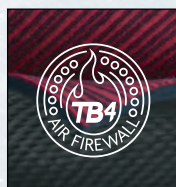

TB3 FIREWALL

The lightest neoprene, the ENVY foam rubber core, paired up to an ultra-light thermal liner with water repellent, water drain channels, and quick dry properties.

THERMO-X HYPERDRY

Thermal fleece maximum insulation with minimal water absorption and PFAS-free DWR treatment.

TB4 AIR FIREWALL

The next great thermal breakthrough is made better with trapped pockets of air. TB4 Air Firewall uses a special lamination process paired with a core of aerated neoprene and a graphene fiber jersey to create the toastiest conditions. Take summer with you.

DURASKIN: STITCHABLE SL

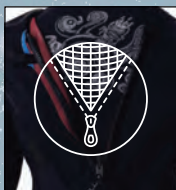

Utilizing a special layering process creates a unique windproof and water-shedding smoothskin that can be stitched and absorbs more glue into its layers. This drastically improves the durability. The ultimate cold-water shield.

KRYPTO ARMOR

Our most durable foam core liner fabric, knit with a special contrast grid pattern that conforms to the body while resisting abrasion and fin cuts. Found in Krypto Knee Padz and Boots.

WETSUIT ENTRIES & TECHNOLOGY

Z.E.N. ZIP CLOSURE

Z.E.N. ZIP (back) entry system with a free-floating zipper panel and a 360° anti-flush barrier with a drain hole, keeps you warm and unrestricted. U.S. Patent #5,898,934

BACKZIP

Full back zipper entry system with a pull cord-equipped durable zipper provides easy entry and exit with a water-resistant seal.

DOUBLE SUPER SEAL NECK

Fully adjustable super soft glideskin seal on the skin. Comfortable and watertight for all-day performance.

F.U.Z.E. CLOSURE

Front Upper Zip Entry (chest) uses a free-floating zipper panel and a 360° anti-flush barrier with drain holes to keep you dry and feeling loose.

ZIPLESS

Ultra lightweight Closure System over a 360° Barrier with drain holes and cinch cord. An incredibly flexible system that makes entry and exits easy with a water-tight seal.

REDZONE ZIP

Urethane coated, offset zipper teeth interlock to stop leaks and keep water from entering the suit.

MODULAR CLOSURE

An innovative pullover mini-zip system allows users to convert the wetsuit from a non-hooded to a hooded suit in seconds. Interchange the Neck and Hood depending upon the conditions.

FEATURES

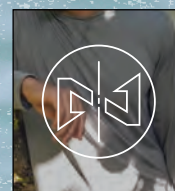

MINIMAL SEAM DESIGN

Insane flexibility, fit, and durability using a unique design which utilizes larger, anatomically designed panels with far fewer seams than ever before.

ULTRAVIOLET PROTECTION FACTOR

Our UPF-rated garments continuously protect you from harmful solar radiation contained within ultraviolet sun rays. Blocks UV far more effectively than sunscreen alone. We offer both 30+ U.P.F. and 50+ U.P.F. Maximum

REVERSIBLE

Our specialty reversible garments are designed with two distinct looks, inside and out, providing dual value. Change it all up with a simple flip.

+ HALF MM THICKNESS

An added 0.5 millimeter in foam material thickness keeps you warmer without noticeable restriction or weight.

HYPERDRY

PFAS-free Durable Water Repellent Technology keeps you dry with minimal water absorption and super-fast dry times, aided by active moisture wicking.

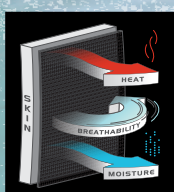

BOARDSHORT CONNECTOR

This built-in durable loop tab secures our tops to shorts. Thread the boardshort tie cords through the loop before tying to cinch down the connection, providing a secure fit.

FUSED SUPER SEAL CUFFS

This specialized technique creates a lower profile finish for ankle and wrist openings. A thinner material section near the opening sits closer to the skin, making it harder for water to push through and providing a more robust, water-tight seal.

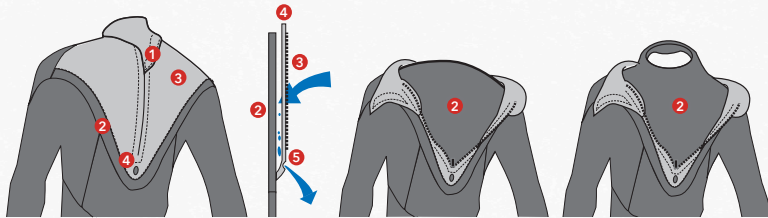

24-7 TECHNOLOGY

A durable and technical fabric designed to be highly breathable, lightweight, and moisture-wicking. Keeps you feeling dry, cool, and lightweight for long days under the sun.

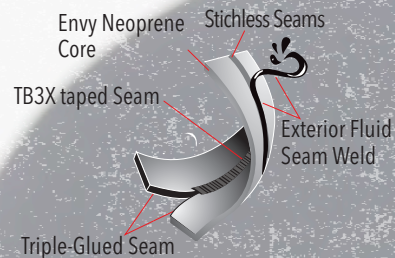

ENTRY & CLOSURES

Z.E.N. ZIP CLOSURE SYSTEM:

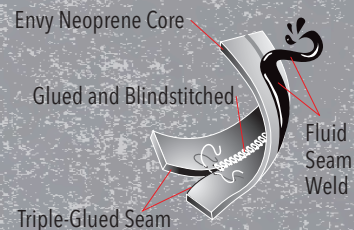

1. Z.E.N. COLLAR: Below the neck zipper collar maximizes comfort and adjustability.
2. THE BARRIER: Blocks out water and facilitates our patented floating zipper design.
3. SUPER SHORT ZIP: A minimal length zipper that maximizes flexibility and maintains ease of entry/exit.
4. FLOATING ZIPPER PANEL: This patent-protected design features a free-floating zipper panel providing unmatched flexibility and seal.
5. DRAIN HOLE: Drain holes guide out any water that enters the zipper panel.

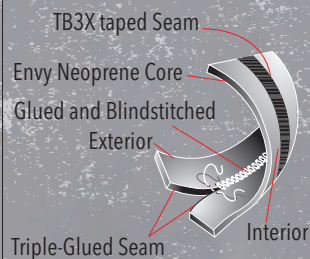

SEAM CONSTRUCTION

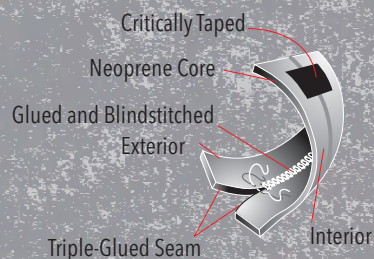

STITCHLESS TECHNOLOGY

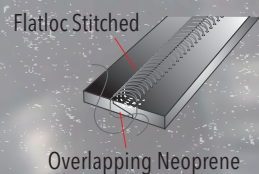

SINGLE FLUID SEAM WELD

TB3X TAPED SEAMS

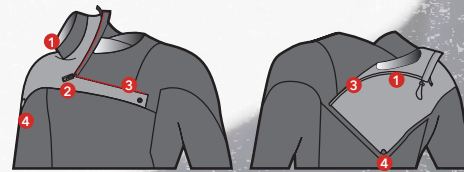

GLUED AND BLINDSTITCHED CRITICALLY TAPED

FLATLOC STITCHED

F.U.Z.E. CLOSURE SYSTEM:

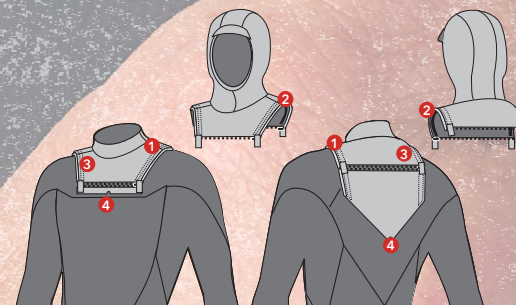

1. GLIDESKIN SEAL NECK: A super dry neck seal that maximizes comfort and keeps water out.
2. F.U.Z.E. ENTRY: A super short Front Upper Zip Entry that is free floating like our patented Z.E.N. Zip Entry System. Very dry and flexible.
3. 360° INNER BARRIER: Blocks out water.
4. DRAIN HOLES: Three drain holes guide out any water that enters the 360° Barrier via the back and arm.

ZIPLESS SYSTEM:

1. ZIPLESS ENTRY SYSTEM: Water tight seal with ease of entry and exit.
2. GLIDESKIN SEAL NECK: A super dry neck seal that maximizes comfort and keeps water out.
3. 360° INNER BARRIER: Blocks out water.
4. CINCH CORD: Keeps you dry and allows unrestricted flexibility.
5. DRAIN HOLES: Three drain holes guide out any water that enters the 360° Barrier via the back and arm.

MODULAR CLOSURE SYSTEM:

1. MODULAR CLOSURE: Interchangeable crew neck and hood with dual cinch feature.
2. PLASMA SEALS: Fluid Seam bands on shoulder lining and inside of closure prevent over expansion and seal out water.
3. FLOATING ZIPPER SYSTEM: Ergonomically positioned zipper panels maximize flexibility by allowing the zippers to float as an unrestricted external layer.
4. DRAIN HOLES: Front and rear drain holes guide out any water that enters.

O'NEILL WARRANTY

GENERAL WARRANTY INFORMATION AND POLICY

Product Warranty

Wetsuits & Accessories: 2 year warranty on all stitching, materials and workmanship

Our warranties only apply to products purchased from an authorised O'Neill Wetsuits retailer when accompanied by the original receipt. To have your wetsuit assessed please return it to the original store of purchase with your receipt.

The following will not be covered under warranty

- Wear and tear from normal use
- Accidental damage such as tears, rips and holes
- Fading from exposure to sunlight
- Damage from exposure to harsh detergents, chemicals or fabric softeners
- Repairs or alterations made anywhere other than at O'Neill or an O'Neill authorised repair facility
- Warranty request without original receipt
- Use in commercial, rental, teaching or instructional programs or activities
- Fit issues - any fit issues should be resolved before the wetsuit is used

Wetsuit Care

- Rinse your wetsuit in fresh water after each use
- After rinsing, fold in half at waist and hang dry out of direct sunlight
- Do not store the suit wet or in direct sunlight

Warranty Claims

All retailers and distributors must submit their warranty claims through our online forms.

The online form requires photographs of the proof of purchase, internal white tag, the item and the fault. Please make sure all mandatory sections of the form are completed with the required photographs. Any submissions made without mandatory information will automatically be rejected which will delay the processing time for the claim.

O'Neill Warranty

O'Neill's Warranty Department will reply to the submission with their decision and corresponding instructions.

O'Neill Returns

- O'Neill Wetsuits do not offer sale or return
- Product may not be returned without obtaining a Sales Return number from O'Neill. The SRnumber may be obtained by calling O'Neill Customer Service at +44 (0) 1730 811460. This number must be clearly visible on the outside of all returned packages. The issuance of SRnumbers is subject to the sole discretion of O'Neill

- Any returns will be charged with a 20% restocking fee
- All authorised returned products must be shipped freight prepaid. Unauthorised and freightcollect returns will be refused
- O'Neill has the right to refuse any returned product that is damaged by any means including but not limited to improper packing or improper display methods at dealer's location, or damage caused by customers
- "Discounted," "Discontinued," "Seconds", and "Altered" suits are FINAL SALES ONLY. NO RETURNS FOR ANY REASON WHATSOEVER
