

O'NEILL

FIRST NAME IN THE WATER

SPRING/SUMMER 2026

WETSUIT ENTRIES

Z.E.N. ZIP CLOSURE

Z.E.N. ZIP (back) entry system with free floating zipper panel and anti-flush barrier-2 with drain hole, keeps you warm and unrestricted. U.S. Patent #5,898,934

BACKZIP

Backzip entry system with durable zipper provides easy entry and exit with a water resistant seal.

F.U.Z.E. CLOSURE

Front Upper Zip Entry (chest) uses a free floating zipper panel and anti flush barrier with drain holes to keep you dry and feeling loose.

ZIPLESS

Lightweight Closure System Over a 360° Barrier with drain holes and Cinch Cord. Water tight seal with ease of entry and exit.

MODULAR CLOSURE

Modular Closure system with dual cinches. Interchange the Neck and Hood depending upon the conditions.

FEATURES & TECHNOLOGY

MINIMAL SEAM DESIGN

Insane flexibility, fit and durability using a unique design which utilizes larger panels and less seams.

NYTROLITE FOAM

3X lighter than regular PVC foam with closed cell foam structure that absorbs 15-20% less water. Approximately 10% more buoyant than PVC foam.

DOUBLE SUPER SEAL NECK

Fully adjustable glideskin seal. Comfortable and watertight.

HYPERDRY

Durable water repellent technology keeps you dry with minimal water absorption.

REDZONE ZIP

Urethane coated, offset zipper teeth interlock to stop leaks and keep water from entering the suit.

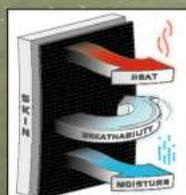

ULTRAVIOLET PROTECTION FACTOR

30+ to 50+ U.P.F. Maximum Protection.

KRYPTO KNEE PADZ

Ergonomic knee protection.

24-7 TECHNOLOGY

Technical material designed to be highly breathable, light weight, moisture wicking and durable.

SEAM CONSTRUCTION

TB3X: FULLY TAPED SEAMS

The lightest, stretchiest neoprene seam tape ever. 0.5mm split-neoprene applied to triple-glued seams with water-based glue to keep you dry and loose.

STITCHLESS

Exterior Fluid Seam Weld and Interior TB3X Tape on either side of a stitch-less seam takes wetsuit construction to the next level. The all-new combination of reliable durability and low-profile comfort simply can't be beat.

FLUID SEAM WELD

8mm silicone-based urethane sealed exterior with a triple-glued and blind stitched interior. Watertight, durable, and ultra flexible seam.

GBS SEAMS

Blind stitched and triple glued to create a watertight seam, for increased durability while allowing the maximum stretch possible in a sealed seam.

FLATLOCK

The stitch uses 4 needles and 6 threads and works by overlapping the neoprene panels and sewing them together. It is a strong stitch and is very comfortable because it is flat, but it is not a sealed seam.

MATERIALS

TECHNOBUTTER 4

TB4 builds on the legendary Technobutter 3, the next evolution of the jersey introduces recycled yarns infused with graphene for increased wear strength and heat retention.

TECHNOBUTTER 4X

Technobutter 4x goes beyond the gooey stretch, and soft feel of TB3x. Recycled graphene fibers line the jersey allowing for incredible stretch with added strength and warmth retention, all with a new look.

TB4 FIREWALL

The all new Technobutter 4 Firewall utilizes the recycled graphene fibers at a thicker pile to create a fire hot feedback loop. As the body heat warms the graphene fibers they conduct the heat back into the body.

TB4 AIR FIREWALL

The next great thermal breakthrough made better with trapped pockets of air. TB4 Air Firewall uses a special lamination process paired with a core of aerated neoprene and a graphene fiber jersey to create the toastiest conditions. Take summer with you.

RECYCLED TECHNOBUTTER 3 & 3X

O'Neill's exclusive Technobutter materials are now being made with sustainable recycled Nylon fibers. Same quality and performance but better for our planet.

TB3 FIREWALL

Lightest neoprene foam core ever, with heat retaining thermal interior layer and quick dry properties even more flexible than before.

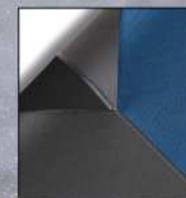

TECHNOBUTTER 3

O'Neill's exclusive, maximum stretch, hydrophobic neoprene with featherlight ENVY foam rubber core. Ultimate warmth and comfort. Built to last.

TECHNOBUTTER 3X

O'Neill's exclusive new pre-stretched neoprene with featherlight, ENVY foam rubber core. The lightest, most flexible, softest material ever created. Superior flexibility and fit.

FLUIDFLEX FIREWALL

Windproof exterior with water wicking interior thermal jersey.

THERMO-X HYPERDRY

Max insulation with minimal water absorption and DWR Coating.

RG8

YULEX® FOAM Core, a FSC-certified natural rubber paired with recycled Polyester Micro Extent Jersey and UltraFlex Lining

ENTRY & CLOSURES

Z.E.N. ZIP CLOSURE SYSTEM:

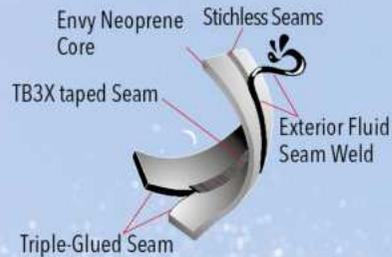

1. Z.E.N. COLLAR: Below the neck zipper collar maximizes comfort and adjustability.
2. THE BARRIER: Blocks out water and facilitates our patented floating zipper design.
3. SUPER SHORT ZIP: A minimal length zipper that maximizes flexibility and maintains ease of entry/exit.
4. FLOATING ZIPPER PANEL: This patent-protected design features a free-floating zipper panel providing unmatched flexibility and seal.
5. DRAIN HOLE: Drain holes guide out any water that enters the zipper panel.

F.U.Z.E. CLOSURE SYSTEM:

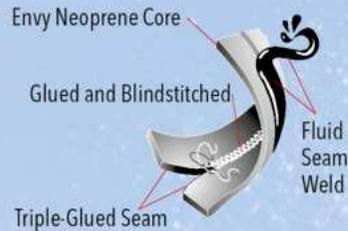

1. GLIDESKIN SEAL NECK: A super dry neck seal that maximizes comfort and keeps water out.
2. F.U.Z.E. ENTRY: A super short Front Upper Zip Entry that is free floating like our patented Z.E.N. Zip Entry System. Very dry and flexible.
3. 360° INNER BARRIER: Blocks out water.
4. DRAIN HOLES: Three drain holes guide out any water that enters the 360° Barrier via the back and arm.

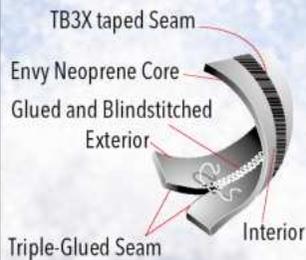

SEAM CONSTRUCTION

STITCHLESS TECHNOLOGY

SINGLE FLUID SEAM WELD

TB3X TAPED SEAMS

GLUED AND BLINDSTITCHED CRITICALLY TAPED

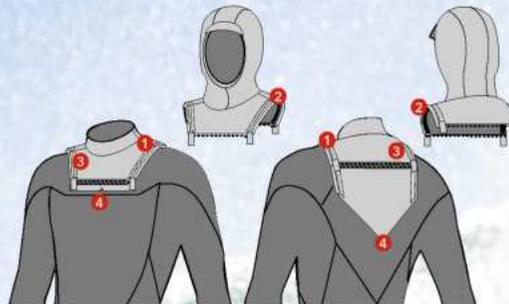

FLATLOC STITCHED

ZIPLESS SYSTEM:

1. ZIPLESS ENTRY SYSTEM: Water tight seal with ease of entry and exit.
2. GLIDESKIN SEAL NECK: A super dry neck seal that maximizes comfort and keeps water out.
3. 360° INNER BARRIER: Blocks out water.
4. CINCH CORD: Keeps you dry and allows unrestricted flexibility.
5. DRAIN HOLES: Three drain holes guide out any water that enters the 360° Barrier via the back and arm.

MODULAR CLOSURE SYSTEM:

1. MODULAR CLOSURE: Interchangeable crew neck and hood with dual cinch feature.
2. PLASMA SEALS: Fluid Seam bands on shoulder lining and inside of closure prevent over expansion and seal out water.
3. FLOATING ZIPPER SYSTEM: Ergonomically positioned zipper panels maximize flexibility by allowing the zippers to float as an unrestricted external layer.
4. DRAIN HOLES: Front and rear drain holes guide out any water that enters.

O'NEILL WARRANTY

GENERAL WARRANTY INFORMATION AND POLICY

Product Warranty

Wetsuits & Accessories: 2 year warranty on all stitching, materials and workmanship

Our warranties only apply to products purchased from an authorised O'Neill Wetsuits retailer when accompanied by the original receipt.

To have your wetsuit assessed please return it to the original store of purchase with your receipt.

The following will not be covered under warranty

- Wear and tear from normal use
- Accidental damage such as tears, rips and holes
- Fading from exposure to sunlight
- Damage from exposure to harsh detergents, chemicals or fabric softeners
- Repairs or alterations made anywhere other than at O'Neill or an O'Neill authorised repair facility
- Warranty request without original receipt
- Use in commercial, rental, teaching or instructional programs or activities
- Fit issues – any fit issues should be resolved before the wetsuit is used

Wetsuit Care

- Rinse your wetsuit in fresh water after each use
- After rinsing, fold in half at waist and hang dry out of direct sunlight
- Do not store your wetsuit in direct sunlight
